

## GEOGRAPHY RESEARCH TASK

### World Heritage Sites

*You will have two lessons in a computer room and one further week to gather your information and prepare your report.*

*You should write or type your report onto A4 paper and include at least one photograph of each of your sites.*

- a) Select and name two World Heritage Sites from outside Australia - one natural site and one cultural site (you might like to consider a site that you have visited personally).
- b) Provide a world map to indicate the location and at least one photograph from each site
- c) For each of your two sites answer the following key geographical questions
  - i. What is there?
  - ii. Where is it?
  - iii. What are the benefits of it being protected?
  - iv. Explain threats that could damage this site?
  - v. What action is necessary to protect it?
- d) By referring to UNESCO's criteria, explain why each site was considered worthy to be included on the list of World Heritage Sites. (In other words: Explain how your sites meet the criteria for a WHS)
